Objective

Senior Software Quality Assurance Analyst with over 18 years of experience in software testing, team leadership, and framework development, with ambitions to transition into a developer or hybrid role.

Work Experience

Pin The Place | Founder & Lead Developer | August 2025 – Present

<https://pinthe.place>

- Created a cloud-native, API-driven SaaS application using TypeScript with React, Node.js (Express), supporting community-created geography quizzes.
- Developed OAuth 2.0/JWT authentication and authorization mechanisms for security.
- Designed and maintained a PostgreSQL data model, including schema design, indexing, and query optimization for production workloads.
- Applied security best practices across backend services, including protection against XSS, SQL injection, and strict CORS policies.
- Validated load and performance with JMeter and Locust for scalability and identifying system bottlenecks.
- Owned the full service lifecycle and architected full-stack services with real-time WebSocket support, including verification, deployment, and iterative improvements.

Rocktillery | Systems Developer (Unreal Engine) | Nov 2024 – May 2025

- Designed and implemented event-driven gameplay systems using Unreal Engine's visual scripting and C++ for performance-critical modules.
- Optimized application performance by refactoring logic to move away from expensive per-frame updates (EventTick), improving CPU efficiency.
- Architected autonomous agent logic using Behavior Trees, managing complex state machines and pathfinding systems.

- Managed full software lifecycle, including debugging, performance profiling, and multi-platform deployment.

Microsoft | Quality Assurance Analyst | August 2023 – September 2024

- Single handedly implemented a test strategy for a testing framework for end-to-end testing from the ground up. Using integration tools like Playwright Cucumber and REST API validation for an IVR frontend logging aggregator.
- Achieved 90% code coverage for automated tests
- Improved key QA KPIs, including defect detection rate and test coverage, resulting in higher product quality and reduced post-release issues.
- Acted as Scrum Master, leading Agile processes.
- Acted as a developer for several months, coding in C# and Java, using ADO for Agile methodology and GitHub for version control and added unit testing.
- Extensive experience automating and supporting high-availability SaaS platforms built on cloud infrastructure (AWS, Azure, GCP) with containerized microservices.

Nuance Communications | May 2006 – August 2023

- Played a key role in test planning for SpeechAttendant (an automated telephony directory); this involved hardware verification on different telephony hardware.
- Worked on the CI/CD pipeline for WebAPI Messenger, a bot API for platforms such as Facebook, Google Home, and Alexa, using REST API.
- Mobile speech recognition API testing. Tested through software simulation and on actual hardware for Android and iOS devices (Android was in Java and iOS was in Swift).
- Experience with kanban boards and JIRA for pipeline automation.

Key Skills

- Automation & Tools: Playwright, Selenium, Cypress, Cucumber
- REST API automation, Postman, Swagger/OpenAPI, JMeter, Locust, CI/CD pipelines, Git, Azure DevOps, Jenkins
- Cloud & Architecture: SaaS platforms, cloud-native and microservices testing, AWS, Azure, GCP, Docker, Kubernetes, high-availability and scalability testing
- Programming & Data: C#, Java, TypeScript, JavaScript, Python, PHP, React, PostgreSQL, MySQL

Volunteering

Grands Frères Grandes Soeurs | October 2019 – Present

Mentoring a kid since he was 6 years old every 2nd weekend, providing guidance, experience and confidence

Education - Dawson College - DEC in Computer Science 2005

Languages - English - French - Polish
